Aura Cleansing and Psychic Surgery

The “aura clearing” process can assist in healing any problem or difficulty including emotional issues, relationship problems, addiction, spiritual issues as well as physical problems. This treatment works by clearing the energy field in and around a person.

This treatment starts with a healing attunement which brings in higher frequency healing energies which are more powerful and effective than those given during a regular Reiki session. This will make the treatment more effective by opening the aura and creating a more receptive state. It also creates the opportunity for the client’s guides to work with her/him in a more powerful way.

First we confirm that the client truly wants to have the problem removed. The next step will be to give the cause of the problem an identity, allowing the client and practitioner to focus directly on the cause and release it. This involves finding the location of the block and deciding what it looks like.

By using Reiki techniques and prayer the issue is sent to God, your higher self and the angel realm for healing. The client will be asked to meditate on letting go and is advised that they need to be willing to learn any lesson or receive any information necessary for the healing process to take place.

In some cases there can be difficulty in removing the issue and in this case some tasking may be provided in order to get the client on track.

Note: *There is a chance that the client may have a healing crisis (diarrhea, headache, weakness) with this type of treatment as the body adjusts to the healing process and begins cleansing. It would be helpful to drink more water, rest and eat lightly.*
